

Expert Panel

This portion of the Clinical Coordinator Track will focus on the following goal:

To disseminate information, network and identify resources from skilled clinical coordinators.

The expert panel will consist of Clinical Coordinators representing a broad range of clinical coordinating experience, geographic areas and expertise. Panelist will be asked to share tips for success, strategies for handling difficult student and preceptor situations and will respond to audience questions. Audience participants will be invited to share their “worse case ever” for panel input.

Please be prepared to get involved with the discussion by bringing case scenarios for the group to work through, examples of what went well and what didn't, and areas that you are currently struggling with. Moderators will be present to maximize attendee's participation and move discussion into areas that everyone will find useful.
